

National Level Analysis

Average Objective Score

The average objective score at national level stood at 19.24 for 2016, considering all the 890 participating institutes across all disciplines and regions at a composite level. This was marginally higher than the national average objective score of 17 in 2015. The range of objective scores for individual institutes varied from 4.11 at the bottom-end of the matrix and 68.28 being the top score for this year's survey.

Category-wise Performance (Platinum/Gold/Silver)

Based on the objective scores achieved by each institute, these have been grouped under Platinum/Gold/Silver categories. Effectively, the Platinum category institutes qualify for the awards. Following table summarises the status of these categories at a national level:

Category	Index	2016		2015	
		Count	%	Count	%
Platinum	>30	164	18%	95	11%
Gold	Between 10&30	478	54%	525	58%
Silver	<10	248	28%	281	31%
		890		901	

Number of participating institutes in 2016 were similar to those in 2015 (890/901). The percentage of institutes qualifying for "Platinum Category" improved from 11% in 2015 to 18% in 2016. However, one prominent reason for

this improvement is the reduction in minimum qualifying marks for platinum category from 35 in 2015 to 30 in 2016. On similar lines, "Silver Category" also had a fall of 3% from last year (28%/31%).
