Academic Projects:**M-PHARMACY**

Title : Synthesis of novel 4, 6-disubstituted -2-aminopyrimidines as
Antibacterial and Anticancer agents

Duration : 1 year

B-PHARMACY

Title : Synthesis and Biological Evaluation of New Isatin Derivatives.

Duration : 6 months

Research Interests:

Exploring the novel drugs in the areas of cancer especially targeting HSP90, MAPkinase pathway which include Ras-Raf-Mek inhibitors.

Computer aided drug design studies which includes molecular docking, QSAR studies, ligand binding studies.

Proteomic investigations to unveil the mechanism of drugs.
